CASE
STUDY

PROJECT: WALMART
LOCATION: TAMPA, FL

Building the future

WALMART TAMPA

Tampa, Florida

SECTOR: Commercial

Scope of Work
Single Skin Profile Panels

Challenges
The initial phase of the project focused on creating a drive-through facility, providing a convenient, contactless shopping experience for customers during the height of the height of the pandemic. The drive-through was carefully integrated into the existing store layout, ensuring that it met both operational efficiency and customer expectations.

Summary
This drive-through addition began as a response to the shifting retail landscape caused by the COVID-19 pandemic, with Walmart recognizing the need to adapt its services to meet evolving consumer behaviors.
